RULING ON ENTITLEMENT¹

On November 2, 2022, Barbara Fribush filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that she suffered a left shoulder injury related to vaccine administration (“SIRVA”) after receiving an influenza (“flu”) vaccine on October 10, 2021. Petition at 1. Petitioner further alleges the onset of her pain was within 48 hours of vaccination, her pain and limited range of motion was limited to the shoulder where the vaccine was administered, that she had no other condition or abnormality which would explain her shoulder pain, and that she suffered the residual effects of her condition for more than six months.. *See generally* Petition. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On October 16, 2024, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent notes that Petitioner's left shoulder injury is consistent with SIRVA as defined by the Vaccine Injury Table and that based on the record as it now stands, Petitioner has satisfied all legal prerequisites for compensation under the Act. *Id.* at 2-3.

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
